DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5,7,9,11-13,22 and 24-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Construction Drying (Munters 2000).

Munters discloses drying services to speed construction activities, protect materials and eliminate moisture problems and control humidity at building projects. The techniques include using desiccant dehumidification, refrigeration and heating equipment. Munters dehumidifiers continuously replace humid air inside the building with air, which has been dehumidified. This extremely dry air has a low “vapor pressure”. The picture of “Union Station, Seattle, Washington” has vapor barrier on the working floor and siding and the picture of “San Francisco, California” has plastic sheeting to cover the windows to form a closed building. Applicant is reminded that there are two prior art from Munters and the second to last line on page 5 of the Office Action mailed 10/23/2006 is for different prior art of Munters (Munters 2000/2001).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3744

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Construction Drying (Munters 2000) in view of Munters (Munters 2000/2001).

Munters 2000 discloses the invention substantially as claimed. However, Munters 2000 does not disclose heating with dehumidification. Munters 2000/2001 discloses dehumidification and heating in the same field of endeavor for the purpose of enhance moisture removal. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the apparatus of Munters 2000 with a heating in view of Munters 2000/2001 so as to improve dehumidification.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
